EDUCATION

2019 – 2022: Bachelor of Computer and Science Information
  ⇨ Software Engineering Department
  ⇨ GPA 3.8

EXPERIENCE AND PROJECTS

Movie Website (Movies125):

2022:
- This movie app was developed using **React.Js**
- Used **Axios** as it dealt with Auth API for the **authentication** and the **themoviedb** API for fetching the movies
- Used React Context State Management to handle user access to the website
- It implements the **React Router v6**, and has 2 different routes to **prevent unauthorized users** from accessing pages useless they are authenticated
- Used **JWT** for decoding the acquired token to have the user data
- Handling forms and user input with **validation**

Meals Live Website (Yummy Best):

2022:
- Sending Http requests and handling responses using (fetch)
- Implemented to somehow follow the concept of components
- You can search for your desired meals and follow the instructions to cook it even you can watch the recipe video on YouTube
- HTML5, CSS3, Bootstrap, JavaScript, jQuery
- Dealt with DOM and DOM traversing
- Animated validations on forms

2021: Social Media App Using Flutter

2021 – 2022: Head / Instructor at Support Student Club at Ain Shams University for Flutter Development.

2022: Internship at Duwaween Games Company for Web Design: It was about involving into the development of games and deliver good user experience games

2019 – 2020: Joined ACM Student Club at Ain Shams University for Problem Solving.

2021: In A Team Of 3 Developed Flutter Movies App: Project on GitHub

Competitions:	1) Collaborated With Team Of 4 In ACM Problem Solving Competition at Ain Shams University.
	2) Collaborated With Team Of 4 In A Competition for Developing Flutter Movie App and Took The 3rd Place.

ABILITIES

1) Full web development life cycle from planning to deployment
2) React.js
3) React context state management
4) Redux & Redux Toolkit
5) React Routing
6) Components, props & dynamic data binding
7) React Hooks and building custom Hooks
8) Styling React apps with "Styled Components" and "CSS Modules"
9) Functional components & Class-based components
10) Sending Http requests & handling transitional states + responses
11) Implementing Authentication, Handling forms and user input with validation
12) Deploying React Apps
13) Combining React with TypeScript & with SASS

TECH SKILLS

1) React.js
2) Restful API
3) Software Engineering
4) Software Development Life Cycle
5) SCRUM (Agile) Methodologies
6) Data Structures & Algorithms
7) OOP & SOLID & Design & Architecture Pattern
8) Clean code
9) Git & GitHub
10) Problem Solving
11) Flutter

LANGUAGES

1) HTML
2) CSS
3) JavaScript
4) TypeScript
5) Dart

LANGUAGE

1) Arabic: Native
2) English: Fluent
3) French: not strong
